**Dynamic, dependable color
that is incredibly easy to use.**

Capable, cost-effective color production.

Take every opportunity to build your business and impress your customers with the SAVIN® Pro C720/C720s. This powerful system provides fast, flawless color at top speed regardless of media. Plus, it includes the flexible finishing and workflow management tools you need to maximize productivity in a wide variety of applications. Engineered for high quality color output, the SAVIN Pro C720/C720s offers a perfect blend of quality and capabilities in a truly cost-effective design.

The easy-to-use Operation Panel simplifies access to job functions, including the built-in EFI™ Fiery® print controller.

Affordable Power and Productivity

The SAVIN Pro C720/C720s delivers everything you need to generate high-quality color output with speed, efficiency and outstanding reliability — for a much lower capital investment than you would expect.

- Increase your capacity for producing exceptional full-color documents without compromising the budget.
- Produce documents quickly with a 72 page-per-minute print engine that is designed for heavy-duty applications and runs at rated speed regardless of media weight.
- Add color capacity that boosts profitability. The SAVIN Pro C720/C720s is ideal for print-for-pay shops, CRDs and other environments that need to take on more color jobs and grow revenue.
- Ensure long, uninterrupted print runs with the ability to replace toner bottles and reload media trays without stopping in-progress jobs. With all options, the SAVIN Pro C720/C720s holds up to

11,000 input sheets and handles output up to 13,000 sheets.

- Optimize output quality with 1200 x 1200 dpi resolution. By offering the same resolution as much faster and more expensive systems, the SAVIN Pro C720/C720s enables you to complete jobs cost-effectively.
- Maximize uptime with Trained Customer Replaceable Units (TCRUs) that allow your trained operators to replace several critical hardware components immediately — without waiting for a service technician.

Professional Inline Finishing

Choose from a variety of inline finishing options to meet specific customer requirements and eliminate the need for time-consuming, offline work.

- Load the system and let it run unattended with the SK5000 High Capacity Stacker. Configure up to two SK5000 for a total capacity of 10,000 sheets.

Pro C720/C720s Color Production System

FAST > INTUITIVE > FLEXIBLE > CONVENIENT > DELIVER >

The SAVIN Pro C720 delivers up to 72 pages-per-minute on any supported media. The SAVIN Pro C720s adds built-in scanning and copying, plus a document server. Both systems offer a range of inline finishing options.

To ensure extremely accurate sheet-to-sheet registration, the SAVIN Pro C720/C720s physically adjusts each sheet for skew, position and alignment, and automatically changes rotation speed to compensate for minor differences in timing created by these adjustments.

The Air-Assist feature separates individual sheets to counteract static cling and eliminate multi-feeds, making it easy for you to run more jobs that require coated media.

- Create stapled and/or hole-punched output up to 100 sheets with the SR5000 3,000-Sheet Finisher/Stapler.
- Generate finished booklets up to 30 sheets (120 pages) using the BK5010e Production Level Booklet Maker or stapled booklets up to 15 sheets with the BK5000 Saddle Stitch Unit.
- Produce cleanly punched, collated documents in a range of styles — such as Velo, Comb, Wirebind and others — with the GBC StreamPunch™ III Punch Unit.
- Fold larger pages into smaller formats quickly and conveniently with the ZF4000 Z-Fold Unit.
- Insert different stock or other documents as cover sheets for reports, plans or training materials using the CI5010 2-Tray Cover Interposer.

Versatile, Flexible Workflow

The SAVIN Pro C720/C720s comes with features that make it easy to handle many kinds of jobs quickly and easily.

- Acquire one system that does it all with the SAVIN Pro C720s. It offers high-resolution scanning, copying and automatic distribution to multiple destinations, including e-mail, URL and FTP. It also lets you store files on a Document Server so you can reprint them without “re-RIPing”.
- Manage production workflow with confidence using a Fiery Print Controller that pushes the SAVIN Pro C720/C720s to achieve optimal performance. This fully integrated platform provides the color management and workflow tools you need to control digital file processing.

The Total Green Solution

Savin continues its long-standing commitment to developing solutions with environmentally friendly and superior energy- and supply-saving features, without compromising productivity.
